

Claim 1: "The Natural Bibliographic Linking System" or "Nat-Link" invention is basically characterized for being a natural system and at the same time the most simple, objective, accurate and expeditious way of linking knowledge and information.

Claim 2: The "Nat-Link" system is not just a natural system and therefore an easy to deal with system, but is above all an exhaustive and integrated system, in contrast with the many contradictory approaches that are now being used in dealing with knowledge and information.

Claim 3: The "Nat-Link" system empowers end-users and scholars to service themselves, as never before.
